# SESSION HELD

INTERESTING

Committee.

Business Transacted.

the Independents.

An enthusiastic meeting of the Y. M. C. A. membership committee was held in the Association parlors from 6:30 to 10 o'clock Thursday evening. The members of the com. mittee assembled at 6:30 o'clock and after enjoying a three course dinner, chairs were pushed back and business of consinderable importance was thoroughly discussed.

Frank H. Owen, president of the committee, acted as chairman, Indi. vidual members were called upon for reports and many interesting details of the work was divulged. John H. Clark toasted to the new members of the committee in a short clever speech. President of the Association E. C. Smith talked along the same lines, heartily welcoming the new members of the committee.

It was decided to publish a com-For the Olsea-Bartl Match plete prospectus of the association. Also to hold an entertainment about the middle of February at which time the Association building will be thrown open and the people of MEN CONFIDENT he city invited in.

Those present at this meeting were Messrs, H. Owen, John Clark, George Von Stein, Frank Zuck, W. And a Rattling Good Contest E. Coler, John Hoffman, Fred Car. hart, R. T. Lewis, M. A. Mickley, J. H. Oatey, E. E. Mittman, J. J. Crawley, E. C. Smith, Walter Cope, Howard Maag, C. L. Leffler, Chicago Sandow Arrives Frem Frank Harriman, Charles Schaffner, Cincinnati and Will Officiate as Frank Smith, J. S. Kilbury and the tablets fall to thoroughly benefit Carl Gottschall.

The regular weekly athletic group contests were pulled of in the Asso. DIVORCED AND Tonight at the Grand Opera clation gym 'ast night. The first House Charles Olsen of St. Louis teams to contest were the Reds and Grays. The latter team won the will attempt to throw the local favolley ball game by the score-15 to vorite. ## COMPLEXION SECRETS

In most instances a bad complexion is due to neglect of the little things in life that are essential to the preservation of one's own natural beauty. All manner of suggestions have been offered by skin specialists, but all agree that he only sure way to secure a clear, healthy complexion is to confrom closely as possible to the aws of nature. To preserve your reshness and beauty, you should live simply, take plenty of out-door exercise, drink quantities of water and be careful of your diet. Remember too, hat beauty is good deal more than skin deep. It is blood deep, and depends also upon your liver; your kidneys and the activity of your bowels. For nearly two years now, they have been telling the ladles of the beneficial effects that Laxakola Tonic Tablets have on the skin. The principal ingredients in them are cascarin and dandelion and every doctor knows that these remedies start the liver going, drive out impurities, encourage the action of the bowels and help clear up the complexion.

A collection was taken, and ninety-five dollars were raised at the morning service for the evangelist, Rev. J. H. Moors, who is in charge of the work. The meetings will continue during the present week, and as long as the present interest is maintained."

### **NEW STEAM TORPEDO**

SEA TERROR WITH TWICE RANGE OF OLD ONES.

Little Vessels Now Able to Defy Big Battleships-May Launch Deadly Missiles Without Coming Under Fire.

New York .- By devising a torpedo ropelled by steam generated in the urning of high explosives carried within it in concentrated form, Hiram Maxim has concluded experiments from which he asserts that the range of naval torpedoes will be doubled and naval warfare revolutionized.

To meet the demand that torpedoes must have effective range equal to the gunfire to which the attacking torpedo boat would be subjected, Mr. Maxim burns motorite, a new explosive, to generate steam at a high pressure, and by this means the regulation naval torpedo is made much more efficient than when driven by compressed air. Only One Way to Secure a Clear the motive power now generally used. In his home in Brooklyn, Mr. Maxim told of his latest invention.

"In spite of the wonderful things that had been expected of the automo bile torpedo as an auxiliary arm in naval warfare," he said, "disappointment has been the result when it has been relied upon. The cause of this failure and disappointment is because the deadly quick-firing gun has been developed to such a degree of perfection and such great range that when the torpedo boat of an enemy comes to the attack it is sunk long before it can get anywhere near enough to be within torpedoing distance of a batcleship. It is met with a storm of projectiles from quick-firing guns which fly toward it with frightful accuracy, and the range of these projectiles is so much greater than that of the automobile torpedo that the torpedo boat is destroyed in not much more time than is needed to make this

"In outward appearance my torpedo is no different from the regulation type, but a self-combustive material called motorite, similar in composition to smokeless powder, is employed e furnish the motive power for driving it through the water. This disenses with the use of the heavy air flask and the latter is replaced with a light casing in which the motorite is burned in the presence of water to produce steam with which to drive the torpedo engine.

"It ought to give us a range at least twice as great as the present torpedo with the maximum speed that can be got from the propellers.

"The enormous range of the Maxim orpedo is a great desideratum, for it will then bring the range of the torpedo up to that of the guns which will be opposed to it.

"Summing up for the new motorite ducing a greater efficiency due to long cured by the New Herb Cure. er range, more uniform speed and Father William's Indian Tea higher speed during the entire run; nevnensiveness as the high cost all finale is done away with: greater safe ty on shipboard, as the highly charged air flask-2.250 pounds to the source inch-makes the torpedo a huge bomb if struck by a shot from the enemy, and the great item of saving the expense of air compressors now installed on torpedo boats.

"Filled with motorite, the Maxim torpedo will always be ready for discharging like a shotted gun."

#### CAN HARDEN PURE GOLD.

Alabama Man Accidentally Made Re markable Discovery.

Montgomery, Ala.-Alfred Weaver of this city, has, in collaboration with John Edward Carney, and while en gaged in laboratory experiments in search of a new coherer material for wireless telegraphy, discovered the ar of hardening and tempering the precious metals, such as platinum gold and the like, without alloying them with other metals.

The results obtained by Mr. Weav er's process are the enormous reduc tion in the fusing point of those metals United States, was elected chairand the imparting to them of a degree of hardness in some instances surpassing that of the best tool steel when hardened. Platinum, one of the most refractory of metals, heretofore re quiring for its fusion the oxyhydroger flame, or the voltaic arc, is, after be ing subjected to the new process easily melted before an ordinary gas oline blowpipe and may be cast, again melted and recast indefinitely.

So great a hardness is imparted to these metals by Mr. Weaver's process that a piece of gold or platinum, for instance, can with the greatest diffi culty be abraded by the best steel file and a sphere of either of these metals of say two millimeters diameter, when placed upon a hardened steel anviand struck a sharp blow with an eight ounce steel hammer, will resist such a blow and suffer only the slightest at teration in shape.

Love Not Marriage Motive. Paris .- A French statistician recently

asked 95 girls between 15 and 17 years why they wished to marry. Sixty-one were unable to specify their reasons five replied that they wanted to be able to go out alone, ten in order to amuse themselves, five so they could travel, seven because they wanted to own their own homes, and four want ed to marry for the sake of a future family. Three did not wish to get married. None suggested love as a many of them were too shy to do so

E have appreciated another long felt want in Marion, and have added accordingly, a large stock of "HUYLER'S" Fine Confections. These are the goods that the "one girl" wants, for all of "HUYLER'S" are in original boxes. She likes that kind.

Special while the stock lasts, 7 cakes "Bel-Zo-No" Soap 25c--4c a cake.
